

System WL 108 & Processing Software EC 200

Static - Multiple Axles
in one Operation

A complete system for measuring, processing and printing total weight or the axle group weight of a vehicle in just one operation. The system is composed of as many scales as wheels to be weighed.

Example of composition of a system:

- 6 scales WL 108
- 1 charger E 7084.x
- 1 interface box E 9023.1
- 1 PC with Software EC 200 and printer*

* PC and printer are not supplied by HAENNI

Optionally small levelling mats can be used, in case the number of scales available is less than the wheels of an axle group.
